## UniGo 3005

### UniGo 3005 with a new graphical display

The UniGo 3005 has a display with large graphical characters and a new and very intuitive layout.

### Laptimer and Data Logger in one

Driver and mechanics can analyse results directly on the Laptimer. The UniGo 3005 records data 10 times per second allowing for in-depth analysis on a computer with the included software.

**The included analysis software** provides a complete overview which enables you to compare results between drivers, training sessions, and heats. Available for both Windows and Mac OS based computers.

## Features

<b>All-In-One System</b>	A powerful 32-bit processor controls the user interface and logging. Connects directly to sensors from the box.
<b>Lightweight Plastic Casing</b>	The elegant display casing is just 18 millimetres thick and made of lightweight plastic. Available in several colours.
<b>Advanced Analysis Software</b>	Analyse and compare results from different laps and drivers with the Analysis Software. This allows you to determine the best set-up for both kart and engine.
<b>Easy to Operate</b>	Menu based user interface with explaining help text. Select between different languages. Setup can be moved from one UniGo to another.
<b>Advanced Graphic Display</b>	High resolution display with 16 gray tones ensures easy-to-read text and icons.
<b>Fast Uploading of Data</b>	Equipped with a USB high-speed interface enables transfer of data to a computer with the optional USB cable.
<b>Advanced Data Logging</b>	All available channels are logged at 10 Hz. Storage for 120 min. of data.
<b>Additional Features</b>	2 temperature inputs*, IR or magnet trigger input, speed sensor input* and 200 laps capability.

\* Cable splitter needed
